

Bare Metal Server & Colocation Services

Dedicated Power, Unrivaled Control

Build on dedicated hardware and secure colocation facilities that deliver high performance and low latency. Gain full control, enhanced security, and scalable infrastructure tailored for intensive workloads.

Maximum Performance

Full Control & Customisation

Cost Predictability

Highly Secured Environment

Core Features

Superior Computing Performance

Harness dedicated hardware optimised for maximum speed and efficiency, powering even the most compute-intensive tasks.

Flexible Configurations

Customise hardware to match your specific workload requirements. This ensures optimal performance for all your compute-heavy applications.

Resource-Based Scalability

Expand capabilities by adding more physical resources as needed, ensuring flexibility and tailored growth alongside your business.

Hardened Security Measures

Benefit from dedicated servers housed in a secure environment, reinforced by strict access controls and advanced protocols to protect your infrastructure.

Path to High Edge Performance

01. Choose Server

Select from our ready-to-deploy servers or use your preferred server for a tailored fit.

02. Pick Location

Find the ideal spot within our global network to position your server close to your operations.

03. We Set It Up

From installation and configuration to power management, we handle the entire deployment process for you.

04. Local Support

With local resources, we provide fast deployment and reliable onsite support whenever you need it.

Global Network Coverage

With coverage over 50 countries, our Colocation Services ensure your Bare Metal Servers are strategically positioned near your operations, providing optimal performance and low-latency connectivity.
